Godt

Kunne ikke starte et spil.skete intet da jeg trykkede på galaga osv. Desktop, Win 11, Chrome

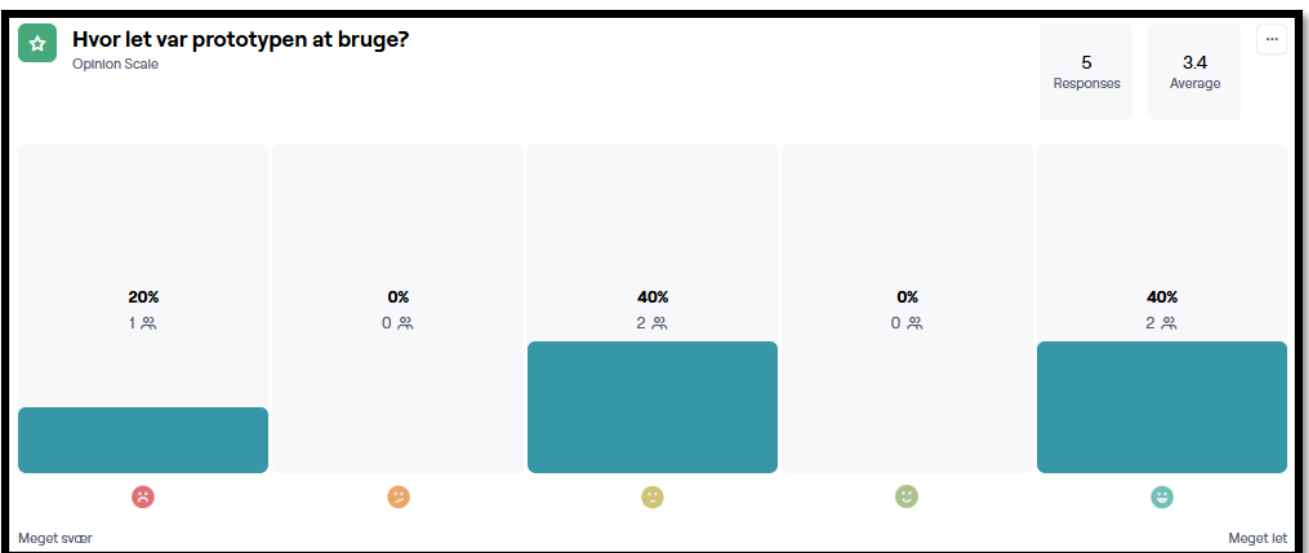

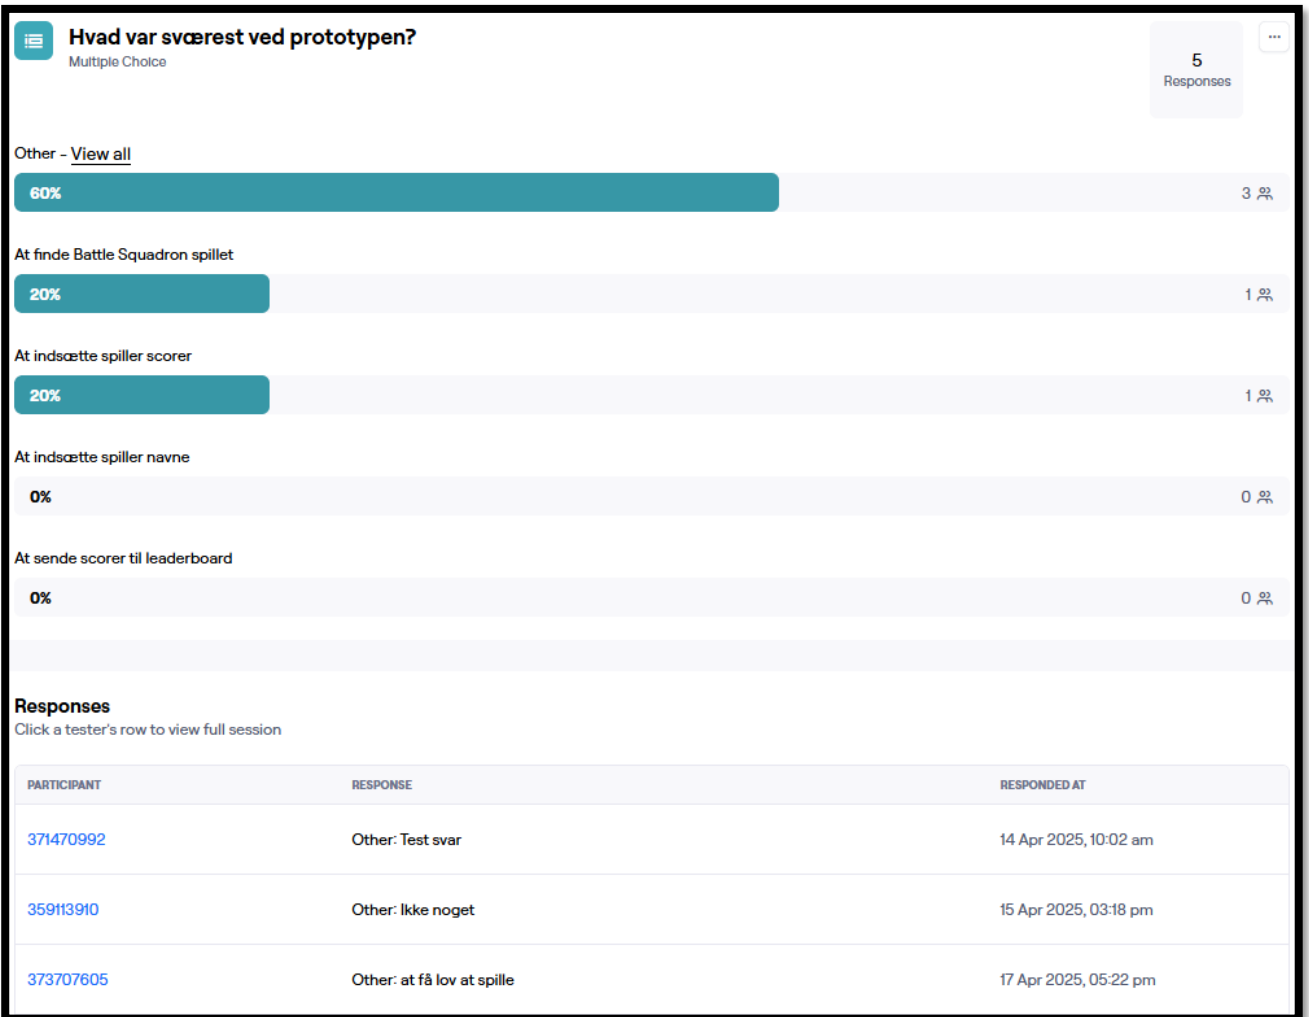

Participant 373707605

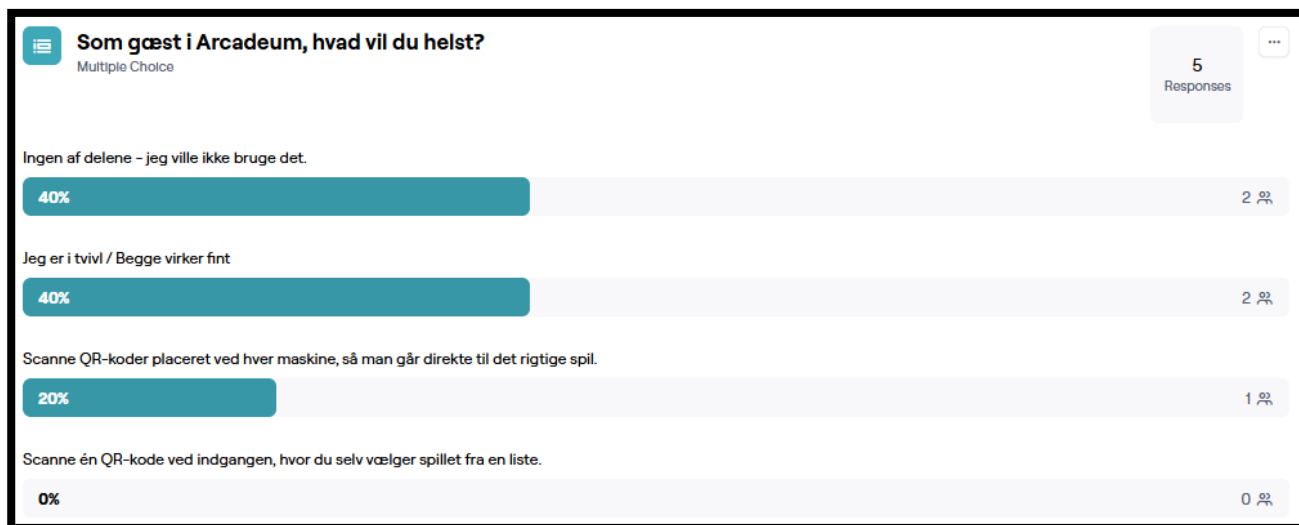

Bedre stilistisk ren grafik der passer til de billeder af spillene tak. Indtast navne efter man har fået score. Score burde ikke skrives ind manuelt men bør læses fra systemet hvor man spiller spillet så man skal lave mindre som bruger. Mindsker user friction at indtaste navn og score efter spillet, der er encitament til det fordi man allerede har haft det sjovt og vil eje ens score. Se Nir Eyal's bog Hooked, at skrive navn ind og taste score ind er investment skridtet, som skal være tilsidst. Men nej var ikke frustreret eller forvirret

Participant 373708304

meget enkel at forstå
